

## Additional Safety Measures for Summer Camps 2021

Updated May 2021

Our summer camp procedures have been modified to put the health and safety of our campers and staff first as we seek to provide a fun summer camp experience amid the current health situation.

With guidance from the American Camping Association, Association of Camp Nursing, the US Center for Disease Control (CDC) and the state of North Carolina, we are following Covid-19 summer camp safety precautions and ***here is what you can expect at camp:***

- We will utilize a carpool line for drop off and pick up. Parents are asked to remain in their vehicle and refrain from entering facilities. If you need to reach someone, please call 704-708-6194.
- Masks will NOT be required when outdoors, but campers should bring a mask with them. Any mask requirements will be based on the latest guidance from local and state authorities.
- Campers will participate in cohorts and have minimal contact with other camps.
- Camp locations will be thoroughly cleaned each day and hand sanitizer and disinfecting wipes will be available at each camp location.

If you have a specific question about camp, please contact us at [camps@covenantday.org](mailto:camps@covenantday.org).

In turn, ***we ask that you do not bring your camper(s) to camp and contact camps staff (704-708-6194 or [camps@covenantday.org](mailto:camps@covenantday.org)) if anyone in your household has:***

- A pending Covid-19 test OR will be seeing a doctor where a test might be done\*
- Tested positive for Covid-19
- Been exposed to an individual who has tested positive for Covid-19
- Been experiencing the following Covid-19 symptoms (dry cough, shortness of breath, fever, or loss of taste and/or smell)
- Been exposed\*\* to an individual who has Covid-like symptoms, plans to take a test, or has a pending Covid-19 test

\*If you have a sick camper or other household member who will be seeing a doctor for evaluation, all household members must stay home if there is a chance that a Covid-19 test may be performed as part of that evaluation. This does not apply to tests performed for work or required before a procedure, only for tests related to Covid-19 exposure and/or symptoms.

\*\*Close contact is defined as someone who was within six feet of an infected person for a cumulative total of 15 minutes or more over a 24-hour period starting from two days prior to illness onset (or, for asymptomatic patients, two days prior to test specimen collection) until the time the patient is isolated.

While we strive to provide a safe camp environment and are following guidance from camp associations, the CDC and the State of NC, please use judgment in determining if your camper should participate in camp if they are in a high-risk category or lives with someone in a high-risk category.
